

One story in class (big):

Recursive	Iterative
1. we: To gather the box from industrial.	1. we: To gather the box from industrial.
2. while: To load the iron box.	2. while: To load the iron box.
3. while: To load and shape	3. while: To create a dry diagram. OK
4. while: To create an original box. OK	3. while: To create an original box. OK
5. To cast the last box.	4. To cast the last box.
6. To cast the last box.	5. To cast the last box.

Diagram for Student Java program:

```

classDiagram
    class Student {
        name
        age
        height
        weight
        sex
        color
        getInfo()
        showInfo()
    }
    class Person {
        name
        age
        height
        weight
        sex
        color
        getInfo()
        showInfo()
    }
  
```
